

RADIONIC INSTRUMENT

Equi-Bio

Rebalancing of the immune system

Strumenti
Radionici

Equi-Bio

Directly from 'Crop Circles', the new radionic instrument for healthy immune system maintenance, which acts on both excesses and deficiencies, bringing the body's cells back into harmonic vibrational balance.

The instrument is designed for:

- *Dissolve metals, toxins, molecules, parasites;*
- *Integrate elements, products, trace elements, mineral salts and Vital Energy;*
- *Bring the body back to its Vibrational Harmonic Balance.*

Accompanied by:

- Instruction booklet
- 47 discs
- Compass
- Pendulum
- Quadrant
- Diagram for radiesthetic analysis

MEASUREMENTS Ø28x7,5 cm
WEIGHT kg 1,3

TECHNICAL FEATURES

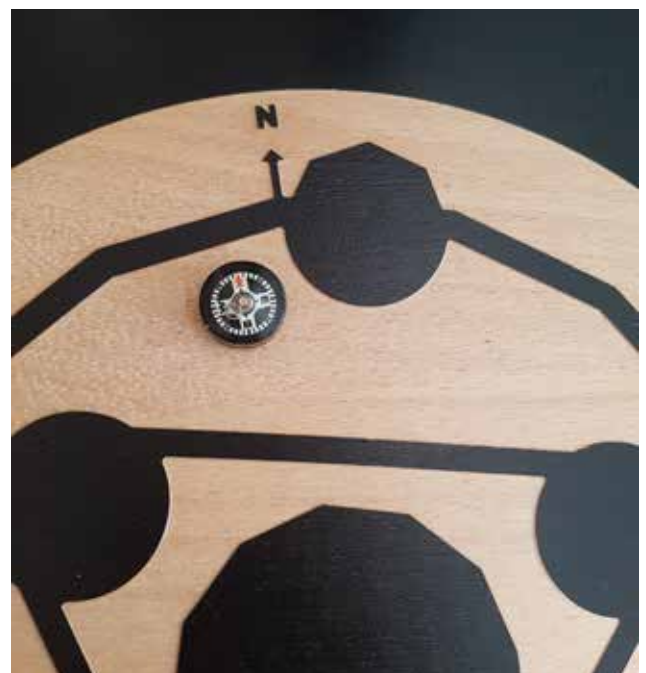

It is made of marine plywood in a round shape with a diameter of 28 cm.

It consists of a base below (container for accessories) and the part above (the actual working instrument). *The precise orientation indicated by the arrow is very important!*

You begin by analysing the list of products, provided in this instruction booklet, by the appropriate quadrant, to identify the presence of products in the physique of the subject to be analysed.

The balance for each element is on No. 40.

Values in slight excess up to No. 45 or in slight deficiency up to No. 35 are tolerable. On the other hand, values from 46 upwards are not tolerated, because they are considered excessive, and from 34 downwards, because they are considered deficient, and therefore to be treated with the Equi-microbiota.

CLEANSING AND SUPPLEMENTING SUBSTANCES FOR OUR IMMUNE SYSTEM

Now more than ever we need a radionic instrument like this

Dear friends of Radionics, this new instrument, derived from a “crop circle” created about 10 years ago in our region of Emilia-Romagna (Fig.1), has been given to us to be used for Radionic use for the health of the human being. We propose it to you, with the appropriate instructions, for a good cellular rebalancing, better specified as a strengthening of the “immune system”.

Being a purely Radionic instrument, **it does not need to be powered by electricity or an Orgone Accumulator, as it is powered by cosmic energy with Radionic frequencies in synergy between heaven and earth.** We believe that **Vibrational Medicine** should not be considered the medicine of the future, but that it is the medicine of today, which **has always existed.**

Since the beginning of Cosmic Creation, there has been a lack of both awareness and the ability to apply certain tools, and perhaps even the confidence to implement our vibrational intervention skills, thinking perhaps, that we are not up to the task of doing what Nature has given us for the common good!

In Radionics, mental frequencies (intentions) are put into action, with the power of the operator’s Spirit (love energy), that completes the vibrational treatment. Now comes “Radionic engineering” in building the instrument, capable of projecting at a distance, via the ether, and receiving in resonance the healing frequency. Here is the Equi-Microbiota instrument, which will give much satisfaction to our cells and strengthen our immune system, so ‘tried’ by the too many pollutions that our ‘civilisation’ has given us!

Fig.1 - Crop Circle of S.Andrea Faenza (RA) Italy

A hint of history....

I wanted to set out a brief history of the **Crop Circles** but, in researching it, I realised the vastness of such a subject, so I do not feel I am the best person to do so. I invite you to explore this story, as it will surely be a more fascinating story than I could have set out. In 1990 there was a leap, and not only in Hampshire’s Wiltshire Counties, which spread throughout Britain. This phenomenon, in 1991, spread to many other countries around the world, including Germany. The diameter of crop circles varies from 50 cm to 45 m; most are up to 180 m long. In Australia the first appearances began in 1966, in England from 1972.

Rather than the fascinating story of the crop circles, which I had partly learnt from our dear friend Anna Maria Bona many years ago, but without delving into it as I should have, I would instead like to tell you about how I became aware of them on a very occasional basis. **There has been knowledge of the ‘crop circle’ phenomenon since the mid-1970s, in the mature wheat fields of southern England. There was talk of a few specimens, then dozens to hundreds were discovered.**

In short, the story of a happy realisation presents us with a departure, not an arrival; because various perspectives are opening for the vibrational health of our cells.

To you, who will have the opportunity to experience this Instrument, we ask for careful verification in the change of health, before and after any treatment. As there is no scientific analysis to ascertain the release of vibrational toxicity after treatment, we use our body as a sensor and our radiesthetic sensitivity, to determine even the smallest and possible changes that may occur. Let us keep in mind that by doing prevention and rebalancing the immune system, we guarantee ourselves a happy old age, far away from illnesses that are sometimes referred to as heavy.

We often do not know the cause that triggered the disease; not even official medicine, our supposed guarantor, always succeeds. We look forward to your communications that help us improve our difficult, but enjoyable quest.

DESCRIPTION AND CHARACTERISTICS

Equi-microbiota

The balance for each element is on No. 40.

Values in slight excess up to No. 45 or in slight deficiency up to No. 35 are tolerable. Values from 46 upwards are not tolerated, as they are considered excessive, and from 34 downwards, as they are considered deficient and should therefore be treated with Equi-microbiota.

The quadrant has a scale for measuring the values, which are assumed to be necessary for the elimination of one element at a time. The further one moves away from the 'E' balance, the more vibrational intervention with the Equi-microbiota Radionic Instrument becomes necessary.

This, according to the discretion also of a possible radiesthetic therapist, could help in the treatment. These are our starting values, which are indicative and not binding.

Instead, **the position of the discs in relation to the instrument is binding**, depending on what you want to achieve from the 2 realisations you propose:

- **Dissolve** the excess product in the body.
- **Integrate** the product in deficiency in the body.

We have given reference letters to the instrument itself so as not to be confused with the descriptions and positioning of the discs that will be placed above the letters mentioned.

Attention: For each realisation (Dissolve or Integrate), the position of the discs will be markedly different.

ENERGETIC ADVICE FOR RADIONIC FUNCTIONALITY

Normally on instruments we give technical advice, with mechanical action for proper functioning, to avoid breakdown or breakage of the instrument itself.

In this case, since we are dealing with a Radionic Instrument, we are taking the liberty of advising you on something more, since we are entering into a frequency operation and not a mechanical one of energy and not of matter. Having said this, we will not speak of the religious aspect, although we should touch upon the energetic part of Spirit, that is, the power of the mind and heart of each subject, and also the question of intention, of faith in what one wishes to achieve, always on an energetic level and not as an aspect of behaviour dictated by one religion or another. Perhaps for those who believe in the Spirit, understanding and attaining the energetic-vibrational phenomena will be easier for them, than for the non-believer who, as such, does not accept certain frequencies, in times of need.

Radionics works with intention.

Intention is like fuel for an engine, without fuel it will not start, not because the engine is faulty, but because there is no energy! All this is to say that if we do not achieve the desired success, we should not blame the Radionics technology, but our culture in this field.

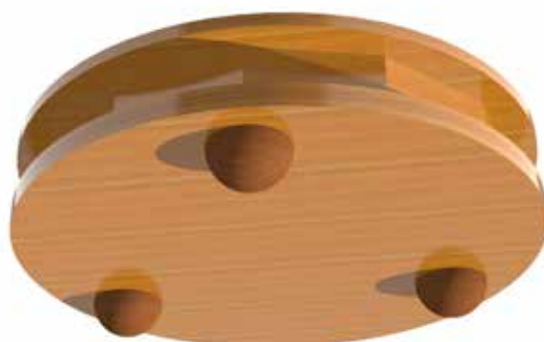

Many people are true 'ignorants' of Nature's phenomena.

The Equi-microbiota Radionic instrument was created precisely to rebalance the components present in people's bodies, so that they do not end up with ailments, the cause of which they ignore. Correct prevention means remaining continuously healthy; always if the cause is duly removed.

We, who work exclusively with frequencies, have sympathetically called ourselves "Artisans of the Ether"; it is easier for us to do prevention, since we act on the vibrational cause and not on the effect, or on matter already corrupted by any erroneous and unbalancing frequencies. We now advise not only to use the instrument correctly, but also to use all of this Radionic vibrational technology, as this is the right way to make the instrument work!

The Equi-microbiota instrument, which is designed to act positively on anyone in need of this exceptional Radionic intervention, automatically locks when it reaches the Harmonic Balance of the product being treated. We can say that we have an important first guarantee and no contraindications.

It is advisable, before making an investigation of a person, to make sure that you have their consent or request for help. Do not dare to investigate others without their knowledge: one's freedom must be respected.

Those who are radiesthesists know what we are talking about

We are therefore addressing newcomers or those who have forgotten about “Karmic Frequencies”.

Speaking of energy, we cannot conclude before having spoken of our power as Operators over ourselves, or of the power of the foreign operator who might act at our request, as a technical-energetic aid.

Our mental and emotional power conditions our intention, therefore, our faith in what we do, sets in motion this kind of ‘vibrational miracle’ of healing. I am not referring to faith in the intervention of an Other towards us, even if it were a pure spiritual Being, whom we could positively call upon for help; this could be a frequency that comes to our aid (welcome), but it is our faith (trust in our intention) that positively acts on the healing required. It is our positive frequencies of the mind and heart, acting in synergy with intention and faith, that enact what we call a ‘miracle’, an event that is little understood by our culture. A culture that is too molecular (materialistic) and not very undulatory (frequency).

It is appropriate to believe in ourselves, for the gift we have received from nature, and above all to give thanks for this free gift. To believe in the other and not believe in oneself is a contradiction, like wanting to forgive the other and not being able to forgive oneself. We are talking about energy, not religion, we are talking about physical, mental, and spiritual frequencies, healing, or illness. So, beware of intentions: these are frequencies that once started do not stop, they travel through the cosmos endlessly!

Many times, we hear the question “how do you reconcile Radionics with Religion?”

The answer has always been the same: Radionics is an existing, unequivocal phenomenon of Nature; Religion can be a valuable aid for those who practise it. For those who believe or not, every day they have to deal with electromagnetic energy, whether they are aware of it or not. Only that the believer, in the spiritual part of the human being, is advantaged by the very high frequencies of the Spirit, who naturally puts them to use also for his health; the non-believer, although having them, unfortunately cannot use them!

So, using electromagnetic energy is for everyone, the power, the quality, is unfortunately for the few. Taking a serious interest in the phenomenon helps Science take co-Science!
